If you desire the quality of commercial dry-cleaning in your home, look no further than Laura Star Magic IS6. This new generation ironing system is both evolutionary in ergonomics and technology. The device allows you to make ironing easier by regulating the table's air-flow according to the weight of the garment. This unique blower provides a cushion of air under the ironing board cover, so that your iron glides over the fabric on air, literally. Eradicating creases is easy with the Vacuum feature, where the fabric is flattened against the ironing board so that unsightly crinkles are effectively removed. The Softpressing Soleplate helps to protect delicate fabrics (wool and silk) thanks to its non-stick soleplate. Another notable feature is the No-Scale build-up thanks to the vertical form of the steam generator and unique draining system.
